WATER RESOURCES BULLETIN 2-27 WATER WELL RECORDS FOR ONTARIO SIMCOE COUNTY 1946-1977

INTRODUCTION

This publication is one of a series which presents water-well information for the Province of Ontario. This bulletin contains water-well data for Simcoe County for wells constructed during the period 1946 to 1977. Table 3 lists previous reports in which similar data have been published.

The information in this bulletin has originated from water-well records completed by water-well drilling and boring contractors licensed in Ontario. The production of this publication was carried out through the use of computer storage and printout facilities. The codes and abbreviations used in the main text are explained in the section entitled, "Explanation of Column Headings".

The geographical area covered by this bulletin is shown on the map on page iv. A summary of the water-well statistics pertaining to the area is displayed in Table 1.

Enquiries

The original water-well records published in this bulletin are available for public reference at the office of the Central Region, Ministry of the Environment at:

150 Ferrand Drive Don Mills, Ontario M3C 3E5

Tel: 416-424-3000

Enquiries about this and previous publications should be addressed to:

The Supervisor
Hydrology and Monitoring Section
Water Resources Branch
Ministry of the Environment
135 St. Clair Avenue West
Toronto, Ontario
M4V 1P5

Acknowl edgements

The Ministry of the Environment gratefully acknowledges the assistance and service rendered by the water-well drilling and boring contractors who submitted the water-well records. This information provides a basic and unique tool in the assessment of ground-water conditions throughout Ontario.

This bulletin was prepared by staff of the Water Resources Branch who were ably assisted by staff of the Financial and Administrative Services Branch.

WATER WELL RECORDS

Each time a licensed water-well contractor constructs a well, a record of the well is submitted to the Ministry of the Environment. The record is then field-checked for reasonable accuracy by the Regional Water-Well Inspector. Subsequently, the information is entered on computer file in Head Office and the original record is filed at the respective Regional Office of this Ministry.

A selection of the important information from each record has been compiled in this bulletin. All data concerning the location, owner's name, date of construction, geological log, screen, water levels, well yields and water use are included. Additional information concerning casing length, drilling method and well plugging are not included in this publication, but are available for any particular record upon request from the Regional Office.

EXPLANATION OF COLUMN HEADINGS

MUNICIPALITY

The water-well records in this bulletin are tabulated in alphabetical order according to municipality, concession and lot number. No concession or lot number is given for those wells located in cities, towns or villages. Urbanized areas which have undergone municipal name changes are indicated with the old names appearing in brackets after the current names, e.g., Barrie City (Innisfil) means that wells listed under this heading are in an area which is now in the City of Barrie, but which was formerly in the Township of Innisfil. In such cases the survey descriptions given are for the former municipality, i.e., the Township of Innisfil.

CONCESS ION

The majority of townships in Ontario are surveyed into a regular pattern of concessions and lots; however, in some areas, geographical historical factors may have created surveys of irregular shapes or patterns. This has resulted in many survey descriptions which are unique to certain areas. The abbreviations used in this bulleting to describe such surveys and tracts are listed below.

Abbreviations	Survey or Land Area	Municipality
Simcoe County		
BF	Broken Front	Rama, Rama Indian Reserve
СВ	Camp Borden	Essa, Tosorontio
ND	North Division	Orillia Twp
OI	Orillia Island	Orillia Twp
PR E	Penetanguishene Road East	Medonte, Oro, Tay
PR W	Penetanguishene Road West	Flos, Tiny, Vespra
RI	Rama Island	Rama
SD	South Division	Orillia
SR E	Sunnidale Road East	Sunnidale
SR W	Sunnidale Road West	Sunni dal e
WELL NO.	(Well Number) This is a unique	number identifying
	each well within the province.	
UTM	(Universal Transverse Mercator	Co-ordinates in
EASTING	Metres) This location system m	
NORTHING	grid, 1,000 metres x 1,000 metr	
	superimposed on maps of the Nat	
	System. The vertical grid line	
	and the horizontal lines Northi	
	The Easting represents the dist	ance of a well in an
	easterly direction from a given	
	line. The Easting is the upper	
	-	_
	The Northing represents the dis	
	northerly direction from a give	
	line. The Northing is the lowe	r figure in the column.
	The UTM co-ordinates were calcu	lated after the well
	locations were plotted on topog	
	locational diagrams submitted b	
	location of a well is uncertain	
	co-ordinate spaces are filled c	
	co ordinace spaces are fiffed c	omprecery with 5 s.
ELEV	(Elevation in Feet) This repre	sents the ground
FEET	elevation at the well site in f	
	level. The elevations were det	ermined from plotted
	locations on the National Topog	
	therefore related to the accura	
	the scale of the maps.	cy of the focations and
	the state of the maps.	
DATE	The month and year of well comp	letion are shown in
	this column.	
DRILLER	The drilling firm's licence num	
	well. Table 2, page 496 is a n	
	licence numbers with the corres	ponding contractors'
	names and addresses.	
w.		

CSG DIA INS (Casing Diameter in Inches) Casing diameters are shown to the nearest inch. Where several sizes of casings are used, the diameter of the upper casing only is given.

KIND OF WATER After the construction of each well, the driller evaluates the water quality with a taste and smell test. The kind of water is shown by the following abbreviations:

FR	Fresh
SA	Salty
SU	Sulphur
MN	Mineral

WATER FOUND FEET This is the distance or distances in feet below ground level at which the driller reported the occurrence(s) of water.

STAT LVL FEET

(Static Level in Feet) This is the distance below ground level to the water surface when the well is not being pumped. Static levels above ground are not given; the notation FLW, meaning a flowing well, is given for this condition.

PUMP LVL FEET (Pumping Level in Feet) This is the distance in feet below ground level to the water surface at the end of the pumping test or the start of a recovery test.

TEST RATE GPM (Pumping Test Rate in Imperial Gallons per Minute) This is the rate at which the well was test-pumped. In some cases the stated rate is a recovery rate, or the flow rate of a flowing well. The reported pumping-test rates are usually the results of short-term pumping tests. They do not necessarily represent the rates at which the wells could continue to supply water for prolonged periods of pumping. Continuous pumping at the stated rates could have resulted in some of the wells being pumped dry, while others may have been capable of being pumped steadily at much higher rates than those reported during the pumping tests.

TEST TIME HR/MIN (Test Time in Hours and Minutes) This is the length of time during which the pumping or recovery test was conducted. Test times of 100 hours or greater are shown as 99 hours 59 minutes.

WATER USE The following abbreviations are used to describe water use:

Domestic	DO
Stock	ST
Public Supply	PS
Commercial	00

Industrial IN
Irrigation IR
Municipal MU
Cooling and Air
Conditioning CA

In the classification of water use, domestic (DO) includes supplies for private household use; (ST) includes supplies for watering and washing livestock; public supply (PS) includes supplies for camping grounds, hospitals, churches, schools and public washrooms; commercial (CO) includes supplies for garages, stores, restaurants, motels, drive-in theatres and fish hatcheries; industrial (IN) includes supplies for factories and dairies; irrigation (IR) includes supplies for greenhouses, golf courses, market gardens and other crops; and municipal (MU) includes wells developed for municipal water systems serving five or more residences.

OWNER/LOG/ SCREEN DEPTHS IN FEET TO WHICH FORMATIONS EXTEND The name of the original owner of the well is given on the top line. The following lines show the materials and colours for each geological formation encountered during drilling. The formations are described by standard abbreviations which are listed in predominant order, i.e., the most common material first and other materials after. General colours and descriptive terms are given where pertinent. The following examples illustrate the principle:

msnd grvl - medium sand and gravel
grey clay fsnd grvl - grey clay and fine
sand and gravel
brwn grvl csnd - brown gravel and
coarse sand
grey msnd wbrg loos - grey medium sand
water bearing, loose

Some of the actual terms employed by the drillers have been altered to conform to the standard list of materials. The standard lists of materials, decriptive terms and colours with the corresponding abbreviations are shown below:

Material Abbreviations

BLDR	boulders
BSLT	basalt
CGVL	coarse gravel
CHRT	chert
CLAY	clay
CONG	conglomerate
CSND	coarse sand

Material Abbreviations

DLMT		dolomite
FGVL		fine gravel
FILL		fill
FLDS		feldspar
FLNT	*	flint
FS ND		fine sand
GNIS		gneiss
GRNT		granite
GRSN		greenstone
GRVL		grave1
GR WK		greywacke
GYPS		gypsum
HPAN		hardpan
IRFM		iron formation
LMSN		limestone
MARL		mar1
MGVL		medium gravel
MRBL		marble
MSND		medium sand
MUCK		muck
OB DN		overburden
PEAT		peat
PGVL		pea gravel
PRDG		previously dug or
1100		bored
PRDR		previously drilled
QRTZ		quartzite
QSND		quicksand
QTZ		quartz
ROCK		rock (bedrock)
SAND		sand
SHLE		shale
SHST		schist
SILT		silt
SLTE		slate
SNDS	•	sandstone
SPST		
STNS		soapstone stones
TILL		till
TPSL		topsoil
UNKN		unknown
WDFR		
MJCK		wood fragments

Descriptive Term Abbreviations

CGRD	coarse-grained
CLN	clean
CLYY	clayey
CMTD	cemented
CRYS	crystalline
DKCL	dark-coloured
DNSE	dense
DRTY	dirty
DRY	dry
FCRD	fractured (broken)
FGRD	fine-grained
FOSS	fossiliferous
	(shelley)
GVLY	grave11y
HARD	hard
LIMY	1 imy
LOOS	loose
LTCL	light-coloured
LYRD	layered (streaked)
MGRD	medium-grained
PCKD	packed
PORS	porous
SHLY	shaly
SHRP	sharp
SLTY	silty
SNDY	sandy
SOFT	soft
STKY	sticky
STNY	stony
THIK	thick
THIN	thin
VERY	very
WBRG	water-bearing
WTHD	weathered

Each formation is followed by a number which indicates the distance to the bottom of the formation. The last number generally indicates the total depth of the well. If a screen is installed in the well, this information is shown in brackets immediately following the formation in which the screen is set. The brackets contain an S for screen, followed by two numbers signifying the depth to the top of the screen and the screen length, respectively.
